

INSTITUTE FOR AUTOMATION ENGINEERING

Institute for Automation Engineering (IFAT)

We would like to **welcome** you to the website of the Institute for Automation Engineering (IFAT)!

The IFAT is an institute of the Faculty of Electrical Engineering and Information Technology (FEIT) at the Otto von Guericke University Magdeburg. It combines research and teaching in the fields of modelling, synthesis and control of complex systems, system and control theory as well as device and system technology implementation.

Under the main navigation point "Institute" you will find, among other things, the chronicle of the IFAT as well as an overview of i staff. The "Chairs" page serves to bring together the chair-specific websites and directs you to the corresponding websites with t help of the most important links. The "Research" section provides a brief introduction to the discipline of automation engineering and an insight into the activities and expertise of the respective IFAT chairs. Furthermore, you can also find our research reports there. Please also note our contact and visitor information on the homepage.

The staff of the IFAT hope you **enjoy reading!**
